

## 10 REASONS TO CHOOSE INVISALIGN

Clear Aligners are an excellent way to achieve your new beautiful smile in the most simple and discrete way. With the latest 3D technology your Orthodontist designs a series of smooth, form-fitting removable plastic aligners that gently apply pressure to your teeth and guide them into position.

### COMFORT

Invisalign offers more comfort and convenience with removable plastic aligners that can be taken out to eat, drink, brush your teeth, and floss.

### CONVENIENCE - FEWER DENTAL VISITS

Fewer follow-up visits are needed with Invisalign than with conventional braces. You should still see your Dentist for regular cleanings and check-ups.

### VIRTUALLY INVISIBLE

Invisalign aligners are virtually invisible when they are being worn, so you can carry out your daily routine with confidence. Plus, you will see constant improvements in your smile as you transition to each new set of aligners. You don't have to wait until your treatment is over to see results like you would with traditional metal braces.

### ADVANTAGES

A huge advantage of wearing Invisalign clear aligners over traditional braces is not getting food stuck in your brackets and wires.

### EASIER TO CARE FOR AND CLEAN

Invisalign clear aligners can make daily oral hygiene easier when straightening your teeth. With traditional braces removing all the food that gets trapped is a huge challenge. With Invisalign, you can remove the aligners so it's easy to continue brushing and flossing.

### CONSTANT IMPROVEMENT - SEE RESULTS FASTER

Braces require patients to visit the orthodontist to get their wires tightened, while patients with Invisalign are given multiple sets of aligners they can change out on their own. Invisalign patients still have routine orthodontist appointments to see how things are moving along, but they usually aren't as often as a tightening appointment for braces.

### FEWER COMPLICATIONS

Each aligner is slightly adjusted from the one previous and you may feel minor tightness that lasts only a day or two after you put in a new set of aligners. You are not likely to experience complications or require adjustments with your treatment like you would need with metal braces.

### FREEDOM

Because Invisalign aligners can easily be taken off your teeth, you're allowed to eat whatever foods you'd like without having to worry about damaging your aligners.

### SIMPLICITY

Although one of the least important factors. This is a major reason people choose Invisalign over traditional braces. The practically invisible aligners make them almost non-existent and being able to remove them completely is an obvious bonus.

### WHITEN WHILE YOU STRAIGHTEN

Although there's only a small chance you'll experience teeth discoloration from braces, you can avoid it altogether by choosing Invisalign instead.

### COST EFFECTIVE

Invisalign can often be covered by your Health Fund. We offer monthly financial plans to make payments convenient and affordable.
